

# LONDON BOROUGH OF CAMDEN

## LONDON

We are one of Keepmoat's approved contractors to remove asbestos from premises in the London Borough of Camden.

Typically the work involves carefully decontaminating sites of asbestos containing material found in fuse boards, floor tiles, flue pipes and insulating board in 1900 social housing properties as part of the Borough's Decent Homes refurbishment programme.

We also provide a reactive service and attend emergency situations where asbestos containing material has been accidentally exposed.

Our 3-hour emergency service can involve arranging an analyst to attend the site to evaluate the risks, sealing the exposure and decontaminating the affected area which is carried out by trained operatives.

In certain circumstances we are able to remove the material on-the-spot.

We are able to bring vast experience of providing asbestos removal in residential environments to this scheme and the skills and knowledge of working in occupied premises.

Communication and our ability to consult and liaise with occupants is a key factor in the success of our work in the Borough.

**Discipline:** Asbestos Removal

**Contract:** Framework

**Duration:** ongoing

**Start date:** Sep 2010

**Value:** £80k pa
